PREPARING YOUR COPY

The Today Acquire app requires minimal data for your digital advertising.

If you have already created a print advertisement the majority of the information will already be stored in AdCompose.

Additional elements such as the web URL, postcode and shorter versions of your adcopy may be all that is required.

Important Information

Postcode and Landing Page URL must be filled.

Ensure all images are landscape

HOW TO

Under your existing properties the new **Acquire Package** option is available.

Select this to access the Acquire send page.

Important Information

If your property is not already loaded to AdCompose, please select the **New Property** button to load the copy and images.

The screenshot shows the AdCompose web interface. At the top, there's a navigation bar with 'adcompose' logo and menu items: Documents, Properties, Shared Images, Help Desk, Details, Modules, and Brochures. Below the navigation bar, the breadcrumb trail reads 'Adcompose / Property / Listings'. The main heading is 'Property Listing'. Underneath, there's a 'Property Links' section with a 'Create a Property:' label and three buttons: 'Property Wizard', 'New Property' (highlighted with a red circle), and 'Show Archived Properties'. Below this is a search bar with a magnifying glass icon and the text 'Search'. The main content area is a table with columns: Name, Images, Modules, and Brochures. The table has three rows of property listings. The second row, '10 Smith Street, Collingwood', is highlighted with a red circle. Each row includes the property name, creation date, and a link to 'Acquire Package'. The 'Images', 'Modules', and 'Brochures' columns show counts for each property.
